Election/Restrictions

1. Group I. Claims 33-35 drawn to Utilizing AC or Specified Waveform other than D.C., classified in class 205, subclass 341.
2. Group II. Claims 36-38, drawn to Performance Monitoring classified in class 700, subclass 108.
3. Group III. Claims 39-42, drawn to Cleaning and Refining, classified in class 205, subclass 693.
4. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Groups I and II, using a waveform to clean a fuel cell, has separate utility compared to the performance monitoring of Group II. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to

provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. A telephone call was made to Charles Gegenheimer (Reg. 33,387) on 5/23/08 in which applicants requested an oral election to Group III without traverse.

6. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Conclusion
